

 Continia

CONTINIA DOCUMENT CAPTURE

About the Solution

The world's most popular solution for scanning invoices and other documents directly from Microsoft Dynamics 365 Business Central.

As the only solution on the market, we offer automatic registration of documents, OCR data extraction, an advanced approval workflow, and a full-text searchable digital archive.

Continia Document Capture is certified by Microsoft and, based on experience from more than 1,500 existing customers, a standard implementation can be performed by your Microsoft Dynamics 365 Business Central Partner in less than a week.

This solution can be integrated with the following NAV versions: 5.01 / 2009/2009 R2 Classic / 2013/2013 R2 / 2015/2016/2017.

AWARD-WINNING OCR

APPROVAL FLOW DIGITAL ARCHIVE

Accelerate document entry registration with the **CONTINIA DOCUMENT CAPTURE**

- CONTINIA DOCUMENT CAPTURE is the best and most complete solution for scanning purchase invoices and other documents directly into Microsoft Dynamics 365 Business Central!
- It is the only solution in the market that simultaneously offers automatic document registration, OCR data extraction, an advanced approval flow and a fully indexed and searchable digital archive.
- DOCUMENT CAPTURE optimizes and automates all your process flows - from document entry to your subsequent search.

Tired of manual entries?

Continia Document Capture optimizes and automates all workflow processes - from receiving a document to retrieving it again when you need it. Using pre-defined e-mail addresses and folders on a file server, all incoming documents are automatically downloaded and OCR processed. Paper documents can be scanned and registered in the same way.

Match of purchase orders

Continia Document Capture includes an advanced set of features for effectively matching purchase invoices with existing purchase orders.

Sales orders and other documents

We also provide scanning of sales orders as standard. It is also easy to create other document types with their own interpretations and rules for what should happen to the document and the related data, such as contracts, certificates, waybills and many more.

Add more documents with Drag-and-Drop

With Continia Document Capture, you can “drag-and-drop” any given file type or e-mail to any record in Dynamics 365 Business Central.

Obtain an overview and take back control

You will always have an overview of the status on the individual vouchers out at the current approver. Each approver can perform their review of documents through the Dynamics 365 Business Central client, or through the Continia Web Approval Portal.

Digital archive

It is possible to retrieve an invoice based not only on data in the Dynamics 365 Business Central fields, but also on information that is only registered on the original invoice, such as specific reference numbers, vendor numbers or serial numbers.

Main benefits

- CONTINIA Document Capture is a Document Management solution fully integrated with Dynamics 365 Business Central that optimizes document registration through OCR technology, integrated information validation and its digital file.
- It generates effective savings in the handling of unstructured information, namely in registration, approval process, digital file and document search, with a quick return on investment.
- Possibility to choose among several licensing models, including subscription.

Why choose CONTINIA?

• + than 1500 customers

Microsoft Dynamics that optimized their business processes with the use of CONTINIA Document Capture

• Increases efficiency

procedures for entry, approval and registration of documents in the Dynamics 365 Business Central

• Eliminate manual entry
