

ARQUICONSULT

Your success. Our solutions.

The solution that allows you to manage your purchasing process

About Purchase Portal?

Flexible and modular solution, complemented with a mobile application, which replaces inappropriate tools for management purchases, increasing the efficiency of your organization.

Say goodbye to several systems maintenance, through the different functionalities that centralize various complementary processes, in a single place.

No matter the size of your organization or your business, Purchase Portal has the necessary tools to help you, with adaptable workflows to your corporate image.

Process Simplification

- | Requisitions, purchase orders, receipt, all with approval flows;
- | Comparison of quotations and registration of proposals;
- | Invoice match, either by purchase order or receipt.

Data Centralization

- | Manage your suppliers;
- | Evaluate your performance;
- | Register your receipts and history of quotations / proposals.

Flexibility and Adaptability

- | Simple and flexible configuration;
- | Parameterization of approval flows to your needs;
- | Mobile application.

Speed and User-friendly

- | Elimination of paper;
- | Bureaucratization of processes;
- | Reduction of approval cycles;
- | Process acceleration.

Main Features

Fully integrated solution with Microsoft Dynamics 365 Business Central.

Multi-company solution.

Make management simplified, with a single platform, which can be consulted by all workers. Make the purchasing process more transparent, faster and with all the information in your hand. Everything in the Purchase Portal.

360° VISION

REQUISITIONS

PROCUREMENT

PURCHASE ORDERS

RECEPTION

INVOICE MATCHING

SUPPLIER MANAGEMENT

POWER THE ORGANIZATION

Create a work screen where you can manage your entire procurement process, from quotes received or to be received, and make the best decision for your business, based on the history of product quotes and your contacts with suppliers.

Use Purchase Portal to receive goods and classify those same receipts. Control what has already been received, what is yet to be received and what needs to be reviewed.

Manage your suppliers in one place, evaluate each one, in different categories, and have a better perception of the transactions carried out. Get the most out of your relationship with your suppliers.

Centralize requisition processes and eliminate excel, email and paper, using a simplified registration process, selecting products/services from a pre-defined catalog or from a list of pre-approved products. Use customized approval flows based on what is requested.

Control the entire contact process between your organization and suppliers. Send purchase orders generated by the system electronically to your suppliers, based on requisition process. Free workers from contact management with their suppliers.

Through Purchase Portal, have quick access to the order or receipt to which the invoice is linked, verify that you are paying for what was delivered or ordered and enter approvers, in case you need validation.

Control internally, through a single location, access all the information you need, define budgets and control each purchase, helping to make the decision with confidence.
