Business Intelligence

WHY BUSINESS INTELLIGENCE?

Make the best decision, based on clean, targeted and timely information.

THE DIFFERENCE BETWEEN THE RIGHT AND WRONG DECISION IS IN THE INFORMATION THAT SUPPORTS IT.

Transversal to different business areas, BI services adapt to the specific operational and management processes of your business. Our solutions are built based on your specificities, but with the common objective of providing correct information to the organization's decision-makers, whether operational, tactical, or strategic, through simple, practical, and intuitive information exploration tools.

WHAT CAN YOU EXPECT?

SYNERGY IN THE USE OF TOOLS

We use tools that, in most companies, are already available and are used in their daily lives, and others that, adding a more advanced exploration, require a minimum learning by the users.

FAMILY INTERFACE

The system is easy to use, both due to its intuitive nature and the familiarity of the interface, as well as metadata provided with terminology recognized throughout the organization.

TO YOUR MEASURE

All projects in BI area are unique. We provide a solution suited to your company's needs, according to your type of business and future use and integration.

SELF-SERVICE BI

With the simple availability of information, and the adoption of powerful but intuitive tools, any user will be autonomous creating their analyzes and reports.

B! PRODUCTS ARQUICONSULT

In addition to the classic BI projects, we have a set of vertical BI modules based on Arquiconsult products of recognized technical and functional merit, which can always be customized and integrate and provide information from complementary systems.

B! HR

The solution for analyzing your company's human resources, in 5 of the main areas: registration, attendance, remuneration, training and evaluation. Identify needs in your company's different business areas with this solution.

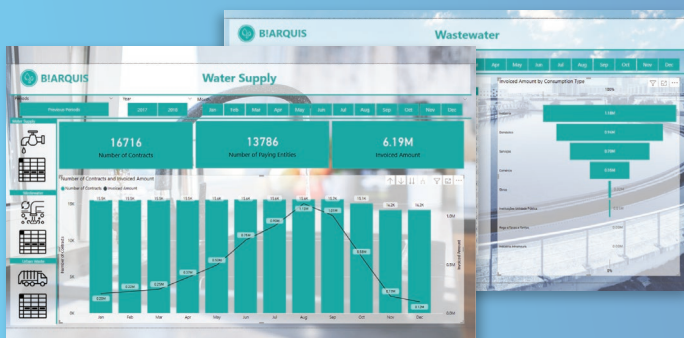

B! RETAIL

For retail companies and based on the technical and functional experience acquired in our LS Retail projects (module integrated on Microsoft Dynamics 365 BC ERP for the Retail area), an analytical module was created that gathers and provides the main indicators for this area.

B! ARQUIS

Aimed at water management system companies, ARQUIS solution helps you in the global analysis of your business using exclusive indicators oriented to water management.

B! TRANS

Customized solution for transport and logistics management, with the availability of typical and specific indicators. Help your company to improve business with B!Trans, a solution suited to your activity sector.

B! ENMIS

Solution connected to enwis), developed on Dynamics 365 BC technology, which allows the complete management and analysis of all areas related to waste management. B!enwis) allows you to extract indicators to better control the activity and increase your productivity and efficiency.

TESTIMONIALS

BUSINESS INTELLIGENCE

Experience proven by several clients from various activity sectors, as demonstrated by some testimonials from managers who work with our Team.

"It is true that we started with a BI solution and the processes have always gone well, have never been a source of stress for the company. I recognize that all the interlocutors I have spoken to from Arquiconsult, whether they are more senior or not so much, have full knowledge of what they are doing. So, I have confidence in Arquiconsult's work."

Hugo Sá, IT Director of Hertz Portugal

"We have information from different sources, making it time-consuming to obtain the necessary data for management analyses, but with a tool such as Business Intelligence this is outdated, and, in addition to speed, analyzes are performed more frequently. We also point out the added value its utility and versatility. And given the reality of remote work scenarios, the importance of this type of solution is reinforced because it allows a faster and more efficient adaptation taking into account the immediate availability of data."

CATARINA MACEDO. Quality and Environment Manager

"Business Intelligence has impact mainly in Sales, Finance and Logistics Planning departments, having as bigger strength structured data, all in one Source, which can be combined easily. Power BI visualizes it, so it is easy to read, giving us reliable and consistent data, Arquiconsult's support so far is considered good and customer oriented."

ALFRED MULLER, ICT Manager

"Business intelligence brings together the multiple sources of information that we rely on to make financial, operational, and sales decisions, into one single interface easy to understand and navigate. As we roll out our BI platform, I think our Executive Management team along with the sales team will see its benefits first. After that, I expect our operations and finance teams to gain insights into their work by using BI. Arquiconsult have been and continue to be a knowledgeable and reliable partner in the implementation and support of our systems."

GREG HIRSON, Vice President of Product.

"The main gaps in management were the Management reports, where we had the data in ERP and in excel files scattered all over the place and we wanted to gather all the information in one place. As for the support Klaveness is quite satisfied, since so far the challenges that have arisen have had a quick response from Arquiconsult's Business Intelligence team. The cooperation has been very positive. In Klaveness' understanding, the partnership will be to continue in the future, in BI and ERP we have new projects in which we consider Arquiconsult to be the main partner."

NUNO MOREIRA. IT & Logistic Manager

GREAT CENTE

"Business Intelligence has many strengths but the dashboards and the way it shows data is the great differentiator of the solution. I think administration and accounting are the main areas that will have the most impact with BI, but this will bring benefits to the entire corporation. Arquiconsult team is attentive, gives us very good support and in the future, we expect more projects, new ideas for IT solutions, which can bring benefits to our company."

FÁBIO LIMA, IT support

ABOUT ARQUICONSULT

Arquiconsult is an information systems consulting company, based on Microsoft Dynamics technologies, with offices in Lisbon, OPorto, Vila Real, Barcelona, Madrid, Seville, Salamanca and Luanda.

Composed by the largest and most experienced team of consultants, having already implemented some of the most complex Microsoft Dynamics Business Solutions and being frequently referred to international clients for their implementations in our country.

Arquiconsult is constantly innovating its offer and has several verticals available, for several activity sectors, which add value to Microsoft Dynamics 365.
