## Microsoft Dynamics NAV/Business Central On Prem: Annual License Enhancement Plan update

---

In recent years, Microsoft has kept unchanged the annual enhancement plan of Dynamics NAV/365 Business Central licenses, which is calculated as 16% of the license value (or, more specifically, the PLP – Protected List Price).

Recently, in line with the path that has been followed by the companies of the sector, and which aims to promote the adoption of solutions in the Cloud, with an associated SaaS licensing model, Microsoft announced that, as of the 1st of October, the annual enhancement plan of Perpetual or On Premises licenses will increase to 17% of the PLP. At the same time, the conditions made available to customers wishing to start the transition process to the Cloud were also communicated. More information about the Extended Bridge to the Cloud program can be found [here](#).

As usual, we will inform each one of our customers, in advance, when the date for the annual renewal of the license enhancement plan approaches, of the corresponding value, keeping in mind that all renewals with a date on or after 1 October will have the updated value to 17% of PLP.
