"The implementation was very fast, adapted to our reality and ensuring compliance with legal requirements."

*— Mónica Veiga,
Financial Director, AviQUIPO*

The AviQUIPO of Portugal is a clear example of how the NAVHR can be successfully implemented in a short period of time. Ten days were how much team Arquiconsult needed to identify the needs in the Human Resources area, the parameterization in accordance with these specifications, training and processing of both companies in the group, AviQUIPO and Cablinfor.

If this alone is reason enough to be a case study, also not cease to be in that demonstrate the importance of the implementation team on the success of it, not depending on this solely the chosen IT solution.

Background

The Aviquipo de Portugal, SA, headquartered in Oeiras is the Portuguese subsidiary of Global Aerospace group. The Aviquipo had already been the target of an implementation of Microsoft Dynamics Nav but satisfaction levels were reduced due to the state of implementation and the resulting underutilization of the system's capabilities.

When Arquiconsult was chosen to make improvements in the installed base of which it is precisely the implementation of NAVHR, thus ensuring that all areas are integrated into the same solution.

Solution

The solution chosen by Aviquipo covered the areas of Financial Management, Sales and Marketing, Purchasing and Warehouse. The project aimed to upgrade and redeploy the purchased modules, plus the solution of Human Resources, NAVHR.

The purpose of this implementation laid beyond the correction of implementation errors previously made in the integration of all business processes, to minimize redundancy processes.

Ten days are enough for the team Arquiconsult put together the needs assessment in Human Resources, the parameterization in accordance with these specifications, training and processing of both companies in the group, Aviquipo and Cablínfor.

"The implementation was very fast, approximately 10 days, taking into account the level of adaptation to our reality. We were able to overcome some of our main concerns, which focused on the integration with accounting and subsequent screening and absenteeism control."

Also the methodology, focused on On-Job training, helped us gain the trust and the application domain, which currently leave us completely autonomous. "

— Paulo Guerreiro, Personal Area Coordinator - Grupo E.T.E

Main benefits

At the end, the implemented solution allows, among other things:

- A centralized management of employee data;
- Management of company absenteeism;
- A payroll process adapted to business needs;
- The integration of salaries in accounting;
- Control of cessation time of contracts;
- Compliance with the general legal requirements.

Modules developed:

Employee Data

Attendance

Remunerations
