ARQEBI

ELETRONIC INVOICING STREAMLINE YOUR FINANCIAL DEPARTMENT AND ENSURE COMPLIANCE WITH EUROPEAN LAW.
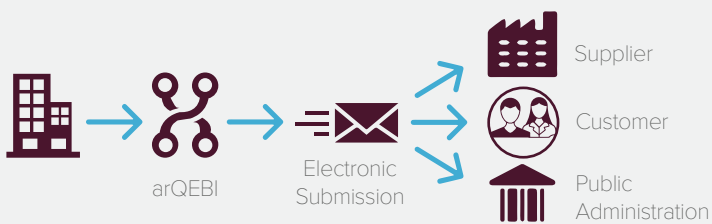

ELETRONIC INVOICING
what is?

According to the EU, eletronic invoicing is "an invoice that has been issued, transmitted and received in a structured electronic format, that allows for automatic and electronic processing" (Directive 2014/55/EU).

In the future will not be enough to send a PDF invoice via email so that it is considered an electronic invoice. Electronic billing requires the creation of data in a correct structure (defined by a European standard model) and sent directly from the seller's system to the buyer.

In this way, the invoice can be automatically imported into the Public Entity's system, without the need for manual insertion.

Public and Private Entities

The rules apply to invoicing on public procurement context and therefore have an impact also on private providers. Should be reinforced that the European regulation was developed to be used by Public Administration and by Private Companies (Business - to Government, Government - to - Government and Business - to - Business).

BENEFITS

Cross-border contracts simplification through uniform procedures
The Community Directive explains that: "The multiplicity of non-interoperable standards gives rise to excessive complexity as well as legal uncertainty and additional operating costs for operators using electronic invoices in the Member States."

Guarantee compliance with legislation
Implementing electronic invoicing in your company allows you to simplify, control, reduce bureaucracy and increase the traceability of processes, to reduce costs and resources used.

Effective saving of resources
Electronic invoices can represent a saving in receiving and sending fixed costs.

Billing settlement speed
Since the invoice is sent electronically and the data processing is automatic by the customer, the electronic invoice can also create the conditions for a faster payment.

International contracts simplification through the standardisation of procedures
Avoid legal uncertainty and additional burdens between EU Member States.

Productivity increase
Automating processes allows you to save time on unnecessary or secondary tasks, allowing the team to have better results.

Increased Customer Satisfaction
The ability to view your eletronic invoices in real time will help you speed up the process of including these invoices in the company's management system and therefore have greater control.

INFORMATION FLOW

About the **ADD'ON**

Secure your Electronic Invoicing with arQEbi

The Add'On for Electronic Data Interchange (EDI) messaging, fully integrated with Microsoft Dynamics ERP.

Supports the exchange of the following messages:
- ✔ ORDERS IN (Orders)
- ✔ INVOIC IN (Purchase Invoice)
- ✔ INVOIC OUT (Sales Invoice)
- ✔ DESADV OUT (Shipping Notification)
- ✔ ORDRSP OUT (Order Confirmation)

Streamline your financial department and ensure compliance with European Law. The electronic invoice can be generated, issued and filed by electronic means, with the same legal value, adding new security conditions for your business.

DYNAMICS INTEGRATION

Full integration to ensure flexibility of processes:

- ✔ Messages exchange by files;
- ✔ Connector Configuration directly from Dynamics 365;
- ✔ Mapping of products, customers, sellers and delivery place through the EAN code;
- ✔ Dynamic mapping of message fields in the fields of Dynamics 365 tables;
- ✔ Queue management with message history maintenance;
- ✔ Magagement of the message mapping errors;
- ✔ It allows to make a set of business validations (prices, discounts, others);
- ✔ Direct integration of messages into Dynamics 365, through the creation of their business documents (Sales Order).

ABOUT **ARQUICONSULT**

Arquiconsult is an information systems consulting company, based on Microsoft Dynamics technologies, with offices in Lisbon, OPorto, Vila Real, Barcelona, Madrid, Seville, Salamanca, Luanda and Riyadh.

Composed by the largest and most experienced team of consultants, having already implemented some of the most complex Microsoft Dynamics Business Solutions and being frequently referred to international clients for their implementations in our country.

Arquiconsult is constantly innovating its offer and has several verticals available, for several activity sectors, which add value to Microsoft Dynamics 365.
