## BUSINESS INTELLIGENCE IN TRANSPORTATION AND LOGISTICS

### DASHBOARDS AND OPERATIONAL ANALYSIS ARE JUST A CLICK AWAY!

The speed with which the business develops and the set of variables that gravitate around it require constant monitoring and quick and effective response. Any decision-maker is obliged, therefore, to have at their fingertips a set of mechanisms capable of providing all the information necessary for the best decision-making: based on current and accurate data.

### MODULES

**The B!Trans immediately addresses some modules:**

- Billing
- Costs/Breakdown
- Margins/Profitability
- Customers/Suppliers
- Transportation Processes
- Travel/Segment
- Load
- Loading/unloading locations
- Performance
- Sellers
- Drivers

### HOW DOES IT WORK?

The biTrans model lives independently of the technology that supports the data for analysis. Data dispersed across databases, spreadsheets or others is no obstacle.

### DATA CHANNELING

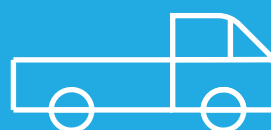

Data on sales, costs (external and internal), profitability and operational performance of trips and activities, vehicles, trailers, drivers, processes, maintenance, and fuels, for example, are channelled to the biTrans model.

### SIMPLE TO USE

The end user has at their disposal a set of ready-to-use metrics, dimensions and attributes through drag-and-drop for tables, graphs and filters.

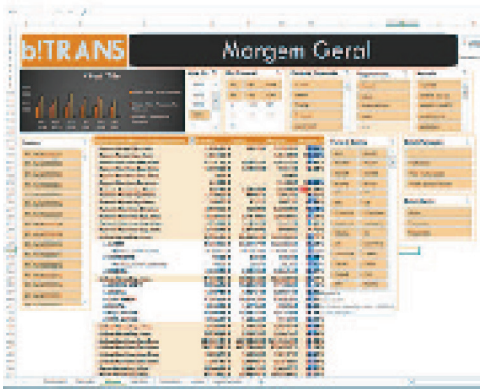

### SCALABLE

"The machine is the limit" – the system is scalable in number of companies, tables, and records. Millions of transactions are easily supported through Microsoft SQL Server technology.

# INVESTMENT

The necessary investment is only through the b! Trans. The exploration of analyses and reports can easily be obtained through MS Excel, typically used in any organization.

# CENTRALIZATION

With B!Trans data system is now centralized. Different users with different reports, with individual rules and different results is no longer a problem.

# BUSINESS REQUIREMENTS

The B!Trans aims to cover 70% of the immediate needs of Transport and Freight Forwarding organizations. Customization to each organization represents a reduced slice in each project.

# REPORTING OUT-OF-BOX

With the acquisition of the B!Trans each organization is equipped with a set of reports ready to be explored immediately.

# ABOUT ARQUICONSULT

Arquiconsult is an information systems consulting company, based on Microsoft Dynamics technologies, with offices in Barcelona, Bilbao, Lisbon, Luanda, Madrid, Oporto, Riyadh, Salamanca, Seville and Villa Real.

Composed by the largest and most experienced team of consultants, having already implemented some of the most complex Microsoft Dynamics Business Solutions and being frequently referred to international clients for their implementations in our country.

Arquiconsult is constantly innovating its offer and has several verticals available, for several activity sectors, which add value to Microsoft Dynamics 365.
