LS Retail for
Furniture

MANAGE ALL YOUR BUSINESS PROCESSES AND KEY INFORMATION IN ONE END-TO-END PLATFORM, AND KEEP ALL UNDER CONTROL.

UNIFY

- **CONTROL ALL YOUR BUSINESS PROCESSES**, including purchasing, warehouses, CRM, store sales, distribution, franchises, and financials, in one platform.

CENTRALLY MANAGE PRODUCTS,

- prices, campaigns, offers and customer loyalty for all your physical locations and eCommerce.

GET A HOLISTIC, 360-degree view

- of your enterprise and of your customers by maintaining all your core business information in one, centralized database.

DESIGNED FOR THE FURNITURE INDUSTRY:

- Manage traditional, custom-made, and assembled items and source items from your stores, warehouses, or external vendors at the POS.
- Manage bookings, like appointments or attendance to workshops, at any point of sale.

PUT YOUR CUSTOMER CENTER STAGE:

- Provide an omni-channel experience with online shopping, click & collect, and ability to return in store items that were bought online.
- Let your customers choose the specifics in their furniture and track the process from reservations to delivery.
- Offer a loyalty program and reward customers with points, personalized offers, and coupons.

EMPOWER YOUR STAFF:

- Allow employees to serve customers, close sales and manage inventory tasks on shop floor with the help of handheld devices.
- Give your staff the visibility they need to deliver the best service. Employees can access to real-time sales data, such as stock information and availability, reports and analytics anywhere and order items at the POS.

CENTRALIZED CONTROL:

- Monitor your KPIs and make better business decisions using LS Central's real-time performance reports and intelligent insights.
- Expand your horizons and increase the number of locations with the help of a software called designed for growth. Its available in multiple languages and localizations.

ACHIEVE OPTIMAL STOCK MANAGEMENT:

- Keep a clear overview of all products available across the company, including layovers and transfer requests.
- Integrate seamlessly integrates open-to-buy functionality with intelligent demand planning, ensuring optimal stock management aligned with actual market needs.
