Microsoft Dynamics NAV/Business Central On Prem: Annual License Enhancement Plan update

The investment and development of Cloud Solutions has been a constant in the world of Information Technologies, especially regarding ERP solutions such as Microsoft Dynamics 365 Business Central (365BC). Among all the Software Houses, Microsoft has been a leader in this area, providing its customers with a path that allows them to do a smooth transition from traditional solutions, licensed through an On Premises acquisition model, for Software as a Service (SaaS) models.

Nowadays, although Microsoft continues to guarantee the support to 365 BC in both models, SaaS and OnPrem, the product evolution strategy aims to highlight the advantages, from a technical and financial perspective, of adopting 365 BC in the Cloud.

Following this line, **Microsoft recently informed Softstore (the company responsible for the Portuguese localization of 365BC and Dynamics NAV) of the new commercial conditions applied to all On Prem licensing.** Consequently, **to keep the investment in the maintenance and evolution of the Portuguese localization, Softstore increased the On Prem license Enhancement Plan by 2%, from the current 18% to 20%, in force since January 1.**

Arquiconsult was informed of this update in mid-December. Aware of the short term that our customers would have to accommodate this change, **we've decided to directly support the 2% differential during the 1st quarter of this year, applying the new rate of 20% only to renewals that occurred after April 1st.** As usual, we'll inform our customers, in advance and on a case-by-case basis, of their updated Enhancement Plan amount.
