Business Central e Navitrans

OVERCOMING THE CRISIS AND PLANNING FOR THE FUTURE WITH NEW PROJECTS

Klog Transport Solutions, a company that operates in the land transport sector, transporting dangerous goods, containers, and cargo in general, was founded in 2018 by the partners of KLOG Logistics Solutions.

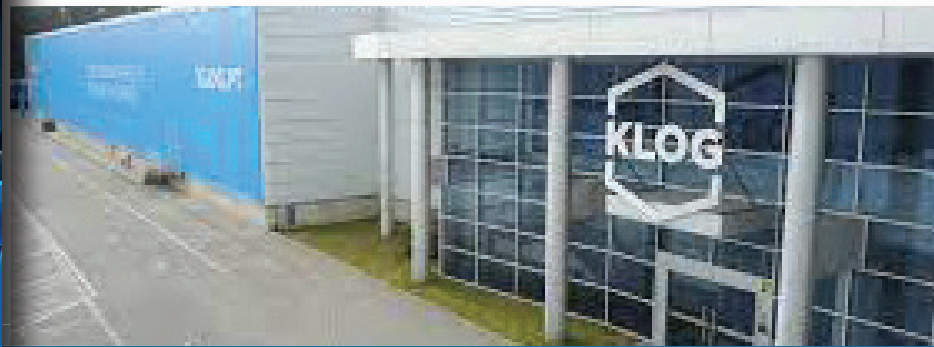

Operating both nationally and internationally, the company has always invested in technology that enables it to respond adequately to its needs.

The ERP Dynamics 365 Business Central Navitrans, in conjunction with the OBC (On Board Computer) solution, a professional GPS telematics and navigation system for lorries, with continuous measurement of driving performance and fleet management, is a good example of the use of a global management tool that adds value to the company's performance and guarantees more efficient management of the entire fleet, with more productivity and fewer resources.

During the period of lockdown to which the country was subjected, KLOG was forced to resort to a total layoff in April and May due to the obvious decrease in the volume of cargo and the closure of its main customers. During this period of closure, KLOG Transportes continued to ensure B2B and B2C deliveries throughout the country via KLOG Logistics' national distribution network. From June onwards, with the gradual resumption of activity, the company went into partial layoff.

In this particular layoff situation, Dynamics Navitrans was extremely useful, as it made it possible to manage salary processing automatically, guaranteeing compliance with all the legal procedures required for both situations, total and partial.

For the near future, the company intends to establish its brand in the international road transport market, with a special focus on the Iberian market. To this end, KLOG has been investing in equipment for general cargo, intermodal, temperature-controlled transport, and special equipment, namely for duo-trailer transport, the latter being a pilot project with IMT. In the very short term, KLOG will begin its activity in the MAGHREB markets.

WHAT IS NAVITRANS?

Navitrans is complete software, designed and built for the logistics service provider industry, which can help you make intelligent decisions, provide your customers with the service they expect and grow worry-free and prepared for the challenges ahead.

With an extensive set of functionalities for road transport, air and sea freight, intermodal transport, and warehouse logistics, Navitrans is the most complete out-of-the-box software on the market.

Navitrans is built on Microsoft Dynamics 365 Business Central and is used entirely via a web browser. It consists of 3 main modules: Navitrans Transport, Navitrans Transits and Navitrans Warehouse. The three modules are designed to work independently; however, they also integrate perfectly.

You can count on Navitrans and the experience of Arquiconsult's implementation team to help you equip your company with a new base of information, operationalisation, and total control, preparing your business for the future.

WITH NAVITRANS YOU CAN

TRANSPORT

Navitrans Transport is very complete software, built for the industry, designed for efficiency. It translates the complex reality of transport companies into easy-to-control processes.

With Navitrans Transport you can:

- Quickly and easily record your transport requests.
- Have a flexible planning tool for a new generation of planners.
- Eliminate the complexity of managing your journeys.
- Calculate detailed costs and increase your business margins.
- Easily adapt to complex pricing agreements with your customers.
- Create invoices according to customer requirements in the blink of an eye.
- Speed up the process of receiving invoices.

TRANSITS

Navitrans Transits has been specially developed to transform the complex reality of freight forwarders managing sea, air, and intermodal freight into user-friendly processes. It has flexible configuration possibilities to easily adapt to the different flows you need to handle with different markets and customers.

With Navitrans Transits you can:

- Get direct access to all relevant information in a single digital file.
- Communicate easily with all parts of the logistics chain.
- Conduct your processes with predefined and flexible workflows.
- Fully focus on your customers' special needs.
- Combine costs from different service providers and create quotes quickly.
- Control the revenue and cost of your processes from end to end, from quotation to final invoice.

WAREHOUSE

Navitrans Warehouse is a warehouse management software (WMS) solution, 100% designed for logistics service providers offering public warehousing services. It has a high level of flexible configurations to easily adapt to the different flows you need to deal with for your different clients.

With Navitrans Warehouse you can:

- Reduce warehouse labour costs.
- Offer the quality of service your customers expect.
- Have total visibility of inventory and track item movements.
- Provide added-value logistics services.
- Focus on managing relationships and interactions with your customers.
- Adapt to variable agreements depending on the customer.

ABOUT ARQUICONSULT

Arquiconsult is an information systems consulting company, based on Microsoft Dynamics technologies, with offices in Barcelona, Bilbao, Lisbon, Luanda, Madrid, Oporto, Riyadh, Salamanca, Seville and Vila Real.

Composed by the largest and most experienced team of consultants, having already implemented some of the most complex Microsoft Dynamics Business Solutions and being frequently referred to international clients for their implementations in our country.

Arquiconsult is constantly innovating its offer and has several verticals available, for several activity sectors, which add value to Microsoft Dynamics 365. Microsoft Dynamics AX is a clear example that allows us to make available to Portuguese and international companies the best and most complete integrated Management solution.
