

SUCCESS CASES

BUSINESS INTELLIGENCE MODERNIZING REPORTING

We have information from different sources, making it time-consuming to obtain the data needed for management analysis, but with a tool like Business Intelligence this is overcome and, in addition to speed, analysis is carried out more frequently. We also point out its usefulness and versatility. And given the reality of remote working scenarios, the importance of this type of solution is reinforced because it allows for faster and more efficient adaptation, taking into account the immediate availability of data. We are satisfied with the partnership, as expected, and we look forward to continued collaboration in the future, with a view to improving as new needs and utilities arise.

Catarina Macedo - Quality and Environment Manager

Transrendufense - Transportes de Mercadorias Rendufenses, Lda is a road haulage services company founded in 1954. The transport company, which operates both nationally and internationally and has more than half a century of experience and knowledge, chose Arquiconsult as its technological partner to implement a Business Intelligence solution.

With gradual growth since 1996, with a focus on the international European market, which already accounts for more than 90% of its business, the company has expanded its operations to include various sectors, namely automotive components, construction materials and packaged dangerous goods. Growth brings with it greater management and control challenges, which is why, aware of the need to modernize its reporting tools, it has implemented a solution that enables it to bring together management data from various sources in a single place, avoiding the time-consuming process previously experienced in obtaining the information needed for decision-making.

Fundamentally, the Operations and Financial areas, which are the ones that are currently benefiting most directly from the advantages of the new solution, with the BI solution containing information related to the Financial, Sales, Travel, Costs, Consumption and Maintenance areas.

The project began in 2019 and has since covered a wide range of information modules. It is expected that with the increased use of the tool, and the users' knowledge of its capabilities, new areas of information and new reports and analyses will be integrated, without excluding the use of the alarm and Machine Learning capabilities that the platform already provides. The existence of different sources of information, which don't always communicate with the same level of detail, was undoubtedly the biggest challenge of this project, which, with a good development methodology and internal knowledge of the client, was successfully overcome.

The Arquiconsult team remains focused on the success of its clients and on creating long-lasting partnerships based on creating the best solutions for the challenges that arise.

WHAT IS NAVITRANS?

Navitrans is complete software, designed and built for the logistics service provider industry, which can help you make smart decisions, provide your customers with the service they expect and grow worry-free and prepared for the challenges ahead.

With an extensive set of features for road transport, air and sea freight, intermodal transport and warehouse logistics, Navitrans is the most complete out-of-the-box software on the market.

Navitrans is built on Microsoft Dynamics 365 Business Central and is used entirely via a web browser. It consists of 3 main modules: Navitrans Transport, Navitrans Transit and Navitrans Warehouse. The three modules are designed to work independently; however, they also integrate perfectly.

You can count on Navitrans and the experience of Arquiconsult's implementation team to help you equip your company with a new information, operational and total control base, preparing your business for the future.

NAVITRANS' ADVANTAGES IN THE TRANSPORT SECTOR

TRANSPORT

Navitrans Transporte is a very complete piece of software, built for the industry, designed for efficiency. It translates the complex reality of transportation companies into easy-to-control processes.

With Navitrans Transporte you can:

- . Register your transport requests quickly and easily.
- . Have a flexible planning tool for a new generation of planners.
- . Take the complexity out of managing your journeys.
- . Calculate detailed costs and increase your business margins.
- . Easily adapt to complex pricing agreements with your customers.
- . Create invoices according to customer requirements in the blink of an eye.
- . Speed up the process of receiving invoices.
