

SUCCESS CASES

AVIQUIPO

Aviquito de Portugal, S.A., based in Oeiras, is the Portuguese subsidiary of the Global Aerospace group.

"The implementation was very quick, adapting to our reality and ensuring compliance with legal requirements"

— *Mónica Veiga,*
Finance Director, Aviquito

Aviquito de Portugal is a clear example of how NAVHR can be successfully implemented in a short space of time. Ten working days was all it took for the Arquiconsult team to carry out the Human Resources needs assessment, parameterization in accordance with the specifications, training and processing for both companies in the group, Aviquito and Cablinfor.

While this alone is reason enough to be a case study, it also demonstrates the importance of the implementation team in the success of the project, which does not depend solely and exclusively on the IT solution chosen.

Main benefits

In the end, the solution implemented made it possible, among other things:

- . Centralized management of employee registration data;*
- . Management of company absenteeism;*
- . Salary processing adapted to the needs of Aviquito's business;*
- . Automatic integration of salaries into the accounts;*
- . Control of the expiry of contracts;*
- . Compliance with all legal requirements.*

Situation

Aviquito de Portugal, S.A., based in Oeiras, is the Portuguese subsidiary of the Global Aerospace group

Aviquito had already implemented Microsoft Dynamics Nav, but satisfaction levels were low due to the state of the implementation and the consequent underutilization of the system's potential.

When Arquiconsult was chosen to make improvements to the installed base, one of them was precisely the implementation of NAVHR, thus ensuring that all areas of the group are integrated into the same solution.

Solution

The solution chosen by Aviquito covered the Financial Management, Sales and Marketing, Purchasing and Warehouse areas. The project aimed to upgrade and re-implement the acquired modules, plus the Human Resources solution, NAVHR.

The aim of this implementation was not only to correct the implementation errors made previously, but also to integrate all the company's processes in order to minimize process redundancy.

Ten working days were enough for the Arquiconsult team to carry out the survey of needs in the Human Resources area, the parameterization in accordance with the aforementioned specifications, the training and processing of both group companies, Aviquito and Cablinfor.

"The implementation was very quick, about 10 days, considering the level of adaptation to our reality. We were able to address some of our main concerns, which centered on integration with accounting and consequent tracking, as well as controlling absenteeism.

The methodology adopted, centered on on-the-job training, also helped us gain confidence and mastery of the application, which now leaves us completely autonomous."

*— Paulo Guerreiro, Managerial Personnel Area
Coordinator - E.T.E. Group*

About NAVHR

A complete Human Resources solution in Microsoft Dynamics NAV for your company. It encompasses areas such as Payroll, Recruitment, Performance Evaluation, Employee Portal and a light version for small companies, among others.

NAVHR is designed for companies of any size and activity. It is a complete and flexible solution, adaptable to different business activities, from Services to Commerce, Distribution or Finance.

NAVHR, the solution developed and implemented by Arquiconsult for the Human Resources area, is the first and only Portuguese Microsoft Dynamics AddOn to obtain CfMD Certification, which guarantees compliance with Microsoft's highest standards when evaluating its partners' solutions.

NAVHR is also the best-selling Dynamics NAV AddOn in Portugal, recommended by more than 30 clients and already having been used in the market for 7 years. It is the only complete Human Resources solution in the Microsoft Dynamics universe.
