

B!FINANCE

BUSINESS INTELLIGENCE

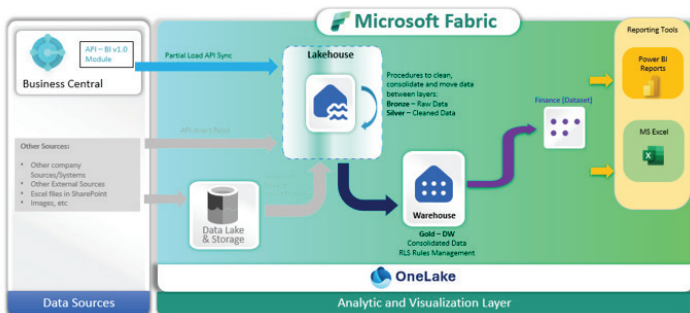

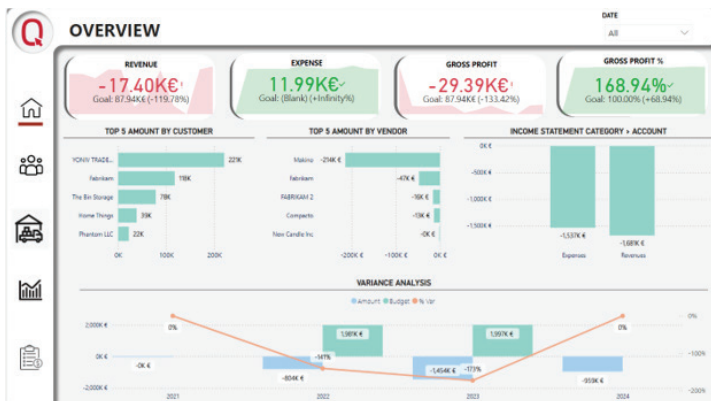

FINANCE

This app effectively identify and address financial needs within different business segments.

In today's fast-paced business environment, making informed financial decisions is more critical than ever. Our data analytics solution seamlessly integrates with Microsoft Business Central, utilizing the powerful capabilities of Microsoft Fabric for efficient data refresh processes and leveraging the intuitive, visually compelling dashboards of Power BI.

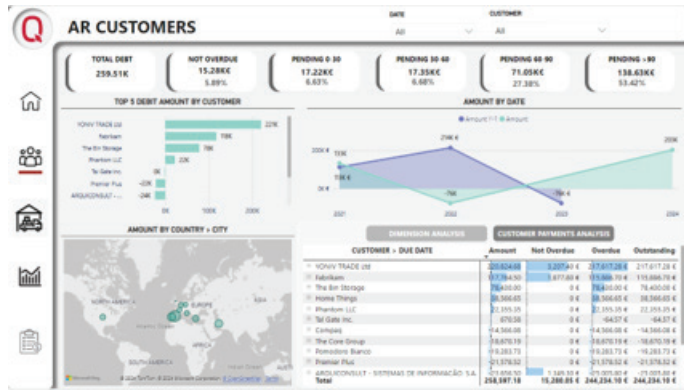

Designed specifically to analyze financial data, our solution transforms complex financial information into clear, actionable insights, empowering businesses to enhance their financial performance, streamline operations, and drive strategic growth. Experience the future of financial data analysis with a solution that delivers real-time, accurate, and insightful financial intelligence.

Benefits:

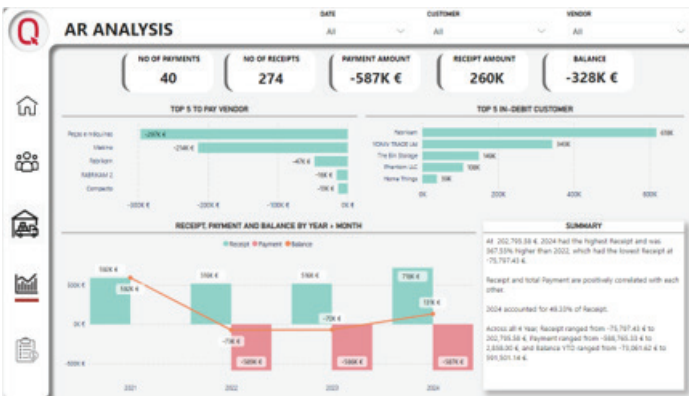

- Gain deeper insights into financial processes (budgeting, forecasting, financial reporting, etc.);
- Measure the performance and impact of financial strategies, data, or tools employed in the company;
- Exercise enhanced control over revenues, expenses, and budgetary allocations;
- Identify potential financial losses, cost inefficiencies, and deviations from financial goals;
- Plan and simulate financial scenarios with precision and confidence;
- Expedite financial data analysis for quicker decision-making;
- Simplify the implementation of financial reports, dashboards, and comparative analytics;
- Accelerate the Return On Investment process for improved financial outcomes.

Global Process

- Data sourced by Microsoft Business Central.
- Data movement, processing, ingestion and transformation with Microsoft Fabric.
- Visualization of data in Microsoft Power BI.

Reporting Highlights

- Our comprehensive Power BI report is designed to provide an insightful view of your financial data.
- With a focus on key financial metrics such as revenue, expenses and gross profit, you can quickly assess your overall financial health.
- The report offers detailed analysis of accounts receivable, including sales distribution by customer location, customer and vendor performance, and overdue balances. It also provides in-depth insights into accounts payable, highlighting payment and receipt activities, balances, and trends over time.
- By identifying top-performing customers and vendors and tracking financial activities with precision, our solution enables you to make informed, data-driven decisions to optimize your financial operations and drive business growth.

ABOUT ARQUICONSULT

Arquiconsult is an information systems consulting company, based on Microsoft Dynamics technologies, with offices in Barcelona, Bilbao, Lisbon, Luanda, Madrid, Oporto, Riyadh, Salamanca, Seville and Vila Real.

Composed by the largest and most experienced team of consultants, having already implemented some of the most complex Microsoft Dynamics Business Solutions and being frequently referred to international clients for their implementations in our country.
